WHAT IS ARCHITECTURAL CONSTRUCTION DRAWINGS AND CONTRACT DOCUMENTATION?

Architectural Construction Drawings are comprised of comprehensive drawing sets, either extracted from a Revit model or created using AutoCAD, to be used for on-site construction. Such drawings are crucial for timely and precise building constructions as they enable accurate, standardized, and detailed representations of every minute detail. This helps mitigate errors that can lead to potentially significant losses in terms of money, time, and other resources. It is also crucial that all codes and standards that may be applicable to the location are kept in mind while proceeding with construction documentation.

ADDMORE ARCHITECTURAL CONSTRUCTION DRAWINGS AND CONTRACT DOCUMENTATION SERVICES

Get quick permit approvals with a detailed set of architectural drawings that includes floor plans, elevations, sections, code compliance check, and electrical plans. We develop construction drawings and documentation for engineers, contractors, and fabricators.

Increase your productivity with an automated, streamlined, and organized construction documentation process.

We offer CAD drafting, detailing, and modeling using the latest versions of AutoCAD, REVIT, and other relevant softwares by request.

We are used to working in both imperial and metric measurement systems for drafting projects depending on the location of the works being carried out.
