

ADDMORE SERVICES

Think Outside the Box and **OutSource**

Do you want to secure more bids?

We got YOU covered.

TAKE OFF QUANTITIES AND COST ESTIMATING

We know how it goes, “we have the T-shirt” as they say

You want more work but the bottleneck to get bids issued is in the estimating department and this restriction will reduce your awarded project potential.

The answer without increasing your fixed overhead costs is to outsource.

The flexibility and scalability of Outsourcing is really the solution to this problem.

We submit a detailed take off with BOQ format ready for your team to price or we can work together. If preferred, we can cost out the BOQ with cost prices only, leaving mark up for your team to assign and allocate.

You worked hard to build your name and reputation and now tenders are pouring in. You want more business not tenders sitting on the desk with no one working on them.

We at ADDMORE can do the labor intensive review of the drawings,

prepare the RFI's, and List qualifications to be considered during pricing.

We can partner with your team and be a back of house support. The end result is more bids are issued with a higher probability of securing more work.

We are aware of the confidential information that can be given to us and have no issue signing Non-Disclosure Agreements.

Don't resist change. Embrace it and outsource in 2021.
